There must be a clearance of 5.5 cm behind the vending machine.

For installation instructions refer to the Service manual.

Design for good taste

Everybody can appreciate a coffee break. Above all, if you have a cup of great, fresh-brewed and tasty coffee in your hand. Here is why we are now introducing the 7300 vending machine, a fully automatic version with 300 cups, having a particularly high capacity and quick-brew function.

So, enjoy your next coffee break! You will find exactly what you are looking for, out of a wide range of top-quality hot drinks.

Attractive and user-friendly

Maybe it is the clean lines, or its strong features? Either way, users are never in any doubt when they come face to face with the elegant, classic Scandinavian design of a genuine Wittenborg.

Innovative on the inside

When you open the machine, you immediately see the ingenious, practical coffee concept and realise why the combination of the latest vending technology and the unique water and mixing system make the machine so easy to maintain and so quick to fill.

Drinks to suit all tastes

You can look forward to your next coffee break! Because the 7300 by Wittenborg brings you exceptional taste sensations based on freshbrew tea, freshbrew coffee, or instant coffee ... And it satisfies even your hottest wishes!

FB 7300

The transparent instant canisters are easy to fill and easy to clean. 7300 has an additional canister for wet sugar only close to the cup turret.

7300 new cup dispenser has a station able to contain more than 300 6oz cups. Both cup dispenser and tower can be tilted for filling. A green locking clip is used to lock the cup tower in dispense position.

Versatility and capacity are perfectly mixed thanks to a dual coffee canister with the possibility to be used as single coffee canister (removing central separation). This operation can be done directly in the field.

Easy access grants clean surfaces and a quick maintenance. It is possible to refill the ergonomically designed canisters without removing them. Colour coding marks parts requiring frequent cleaning. The balanced waste container is very simple to take out for emptying.

Nice coffee!

A single glance at the attractive 7300 table top model by Wittenborg is enough to convince you that this machine has class. From the area with the large poster, the eye is slowly drawn towards the easy-to-follow selection panel with its large, 4 x 20 character LCD display which guides the users through up to 23 beverage selections and pre-selection buttons for coffee or tea strength.

The 7300 comes in one version: Fresh Brew (FB) based on classic ground coffee brewed in the traditional way. The brewer is also ideally suited for leaf tea, producing a truly exceptional drink.

With its flexible configuration options the 7300 has the possibility to work with cups, mugs and jugs. The programmable cleaning cycle, the optimised filling and maintenance procedures contribute to make the 7300 an ideal solution for many locations such as offices, office kitchens and receptions. With the option to install a coin mechanism or cashless system and a wide selection of accessories, it ticks all the right boxes for a modern coffee solution, whatever your taste!
